Figs. 6A-C illustrate a flow chart of an exemplary process implementing a player according to an exemplary embodiment of the invention.

Replace the paragraph on Page 14, line 28 and bridging Page 15, line 9 as follows:

*A2*  
Figs. 6A-C illustrate a flow chart of an exemplary process implementing a player according to an exemplary embodiment of the invention. The process begins at 601. In block 602, the mode is set to play, indicating the beginning of the playing process. In block 603, all segments status is set to planned, and alternate segments status is set to hidden. In block 604, a timer is started. In block 605, the time available, which may take into account the elapsed time of the timer from block 604, is retrieved in any of the ways provided, e.g., user input, other programmatic input, etc., and in block 606, if the mode is set to play, then flow proceeds to block 607 to plan which segments to play (the planning process was just described and is illustrated in Fig. 5). In block 608, the next planned segment is selected, and then flow proceeds to decision block 618 to check if there are any more segments.
